

X8 Electric scooter

Endurance King Smart Electric Scooter

Aviation aluminum alloy appearance

Embedded battery design

Cobra concept design

45Km Max range

Portable folding

HX-X8 Electric scooter

With excellent design, meticulous production details, clever folding ideas and intelligent operating experience. Won:

US UL 2272 safety certification
Certificate No: E485212

Appearance utility model patent
Patent No: ZL 2018 3 0412387.0

ISO9001
Certificate No: M43119Q3016R1M

Guangdong famous brand products - scooter
Certificate No: GD2018-665

CE, Rohs, FCC

UL-2272

Appearance utility model

ISO9001

Guangdong famous brand products

FCC

Embedded battery
Endurance is more durable

Embedded battery
40 lithium batteries cells
Easy to replace and remove

Embedded battery design

25
km/h

Technology, reimagine

Folding scooter for quick use
Bring you faster and farther city travel experience.

45_{Km}

Max range

Aesthetics

Appreciate different beauty

Simple geometric design,
Practice the spirit of craftsmanship
and lead the quality.

Industrial design paradigm

Simple streamlined sports car design

Design is not only the appearance, but also the ingenuity and ingenuity from the outside to the inside.

Travel Commuter Trilogy

Glide and relax in the last Kilometer

01
DESIGN

Simple and beautiful

Simple streamlined sports car design

Intimate and comfortable

Elbow curved pedal integrated design

Clever folding

Simple round buckle design

● Black

40 lithium batteries cells

Detachable Battery prolong the riding distance
Replaceable battery design

02
BATTERY

Automotive power lithium battery,
six smart protection

Short circuit
protection

Overcurrent
protection

Double overcharge
protection

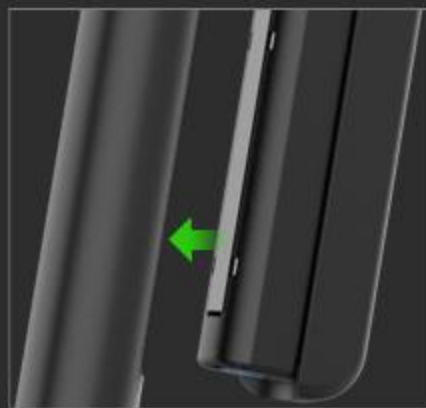

Double over
discharge protection

Abnormal
temperature
protection

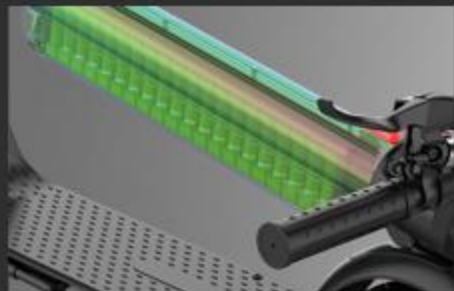

Undervoltage
automatic sleep

Embedded battery design

Lithium battery revolution

First development embedded battery,
Smooth in the rainy day.

The battery is on the pole and has
good waterproof performance.

The battery is under the pedal
and has poor waterproof performance.

Waterproof level IP54

The pedal can support washing

Minimalist folding art
The posture should be more chic

3 second fast folding, pleasant experience.

Simple, is the ultimate complexity

Endless pursuit of minimalist design

03
FOLD

Lightweight design with one-handed walk

Tough aluminum alloy body, portable travel

The use of tough aluminum alloy as the main load-bearing material, Low density but high strength, with Excellent thermal conductivity and corrosion resistance.

15_{kg}

Carry

Elevator

Tail box

Non-slip handle design Comfortable grip

The simple geometric anti-skid handle is designed to support long-term riding and is not easy to slip.

Push-type throttle Free control of riding speed

Waterproof dial design, can be accelerated with a single push, long press the throttle for more than 6 seconds to cruise at a fixed speed.

04
DISPLAY

LED display

Preview speed at any time

High-definition LED screen will let you know all kinds of situation at any time and control the scooter situation.

Ergonomics design.
Easy operation.

Gear position

Speed

Power display

350W

Brushless high performance motor

8.5inch 10 inch

Anti-skid anti-vibration automotive grade vacuum tire

The strongest shock absorption.
Easy through speed bumps
and uneven pavement.

Speed bumps

uneven pavement

Climbing angle

LED Headlight ▶

Super bright headlight,
high brightness LED light.
Riding safely in the dark.

◀ Taillight

Flash when brake and in dark

Brake , triple brake

Disc brake system and E-ABS anti-lock system
High-efficiency braking and quick response,
safe and worry-free riding

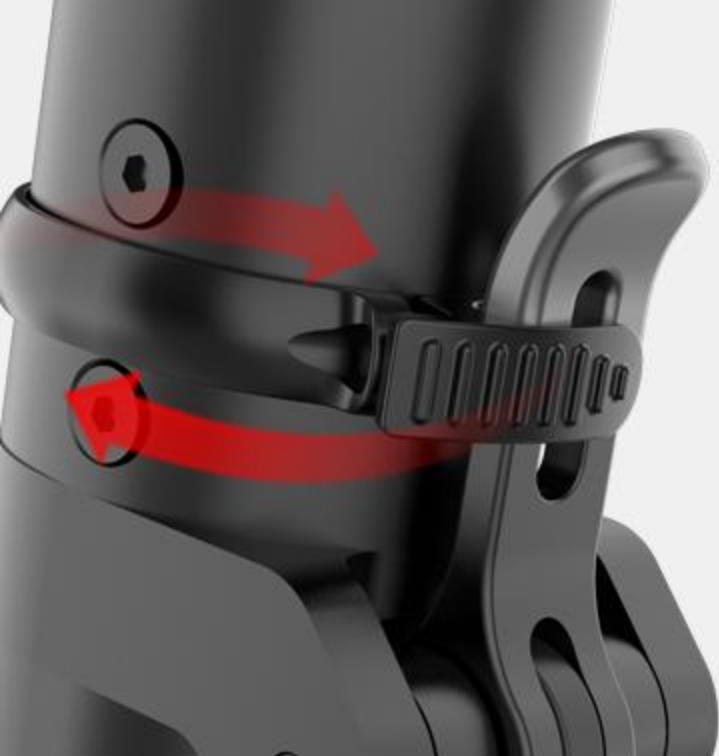

Disc brake system

Electronic brake

Pedal brake

Fast rotation folding

Three-second fast folding, pleasant experience.

DC charging interface DC-42V

Open the silicone cover and charge.
Quite convenient.

DETAIL

Accelerator / Throttle

Zero start and non-zero start
Mode, pedals slide forward
Press the accelerator button
again, The car starts.

Humanized grip design

Non-slip grip design, silicone
and Aluminum-magnesium alloy
combined with each other.

X8 Electric scooter

Parameters	8.5inch	10inch
Open size	1056*420*1166mm	1083*420*1186mm
Folding size	1056*420*450mm	1083*420*460mm
Max range	45km	45km
Max speed	25km/h	25km/h
Tire size	8.5 inch Vacuum tire	10 inch Air tire
Net weight	About 15kg	About 16kg
Frame material	Aviation aluminum alloy	Aviation aluminum alloy
Motor parameters	350W	350W
Battery capacity	36V/10Ah	36V/10Ah
Headlight	LED highlight front light	LED highlight front light
Taillight	LED taillight	LED taillight
Charger parameters	DC42V/2A	DC42V/2A
Motor driven	Front wheel drive	Front wheel drive
Climbing angle	15°	15°
Pedal width	150mm	150mm
Pedal height from the ground	145mm	150mm
Pedal chassis height from the ground	133mm	138mm
Folding method	One step folding	One step folding
Battery removal method	Embedded battery	Embedded battery
Waterproof level	IP54	IP54
Charging time	4-5hours	4-5hours
Applicable height	120 ~ 200 cm	120 ~ 200 cm
Maximum load	20 ~ 100kg	20 ~ 100kg
Hook load	10kg	10kg
